Mr. James Lehrer
Lehrer Sanitary Service
1604 Crook Avenue
Kaukauna, Wisconsin 54133

Dear Mr. Lehrer:

Re: Modified Order Number 2A-75-1045A

On August 26, 1975 the Department of Natural Resources issued Order Number 2A-75-1045 to you relating to the operation of your solid waste disposal facility, landfill, located in Sections 21 and 22, T21N, R18E, Town of Buchanan, Outagamie County, Wisconsin; DNR licence number 73.

This order required that you take certain actions to bring your solid waste disposal facility into compliance with Chapter NR 151, Wisconsin Administrative Code. It required specifically that you submit a hydrogeologic feasibility study for this site, and based upon the results of the hydrogeologic feasibility study and the Department's review, you were to submit a final engineering and/or abandonment plan for this site by April 1, 1976. You have hired Soil Testing Services of Wisconsin and Harris and Associates, Inc. as professional consultants to perform the necessary work as required by the original order in August, 1975. They have been in direct contact with the Department of Natural Resources on a number of occasions and obtained most of the necessary field information to prepare these reports and plans. Most recently, on March 12, 1976 a preliminary feasibility report and engineering plan were submitted to the Department of Natural Resources for review. These plans were reviewed by the Department of Natural Resources and a letter dated April 20, 1976 was sent to your consultants in review of those plans. That letter basically described that the facility was feasible for a solid waste disposal operation as proposed in the preliminary plan with certain modifications.

Based upon your efforts thus far to complete the feasbility and engineering plans for this facility, please be advised that the order section of Order Number 2A-75-1045 is hereby modified and superseded by the following order provisions:

00947

4-29-76

1. That the order recipient shall by May 28, 1976 submit to the Department of Natural Resources a final hydrogeologic report and preliminary engineering plan prepared by a registered professional engineer for this facility. This feasibility report and engineering plan shall be in keeping with the review comments of the preliminary reports which were forwarded to you by copy of a letter dated April 20, 1976, to Theodore J. Harris, your consultant.

2. That within 30 days of the date of receipt of an acceptable hydrogeolgic feasibility and engineering plan, the Department of Natural Resources will inform the order recipient in writing of any comments or corrections necessary prior to finalizing those plans.

3. That by August 1, 1976 the order recipient shall submit to the Department of Natural Resources a complete and adequate final engineering plan prepared by a registered professional engineer in accordance with ss NR 151.12(5), Wisconsin Administrative Code, at a minimum.

Dated at Madison, Wisconsin, this 29th day of April, 1976.
